| Revised Technical Specification |                                                                                |                                                                                                                                                                                                          |                                                                                                                                                                  |
|---------------------------------|--------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Sr. No.                         | RFx Clause                                                                     | Previous Clause                                                                                                                                                                                          | Revised Clause                                                                                                                                                   |
| a.                              | Master Node 1 – Processor                                                      | Dual processor, minimum 16 physical cores per processor (32 cores per node), 3.0 GHz, minimum 128 MB aggregate cache                                                                                     | Dual/single core processor, minimum 2 x 16 Or, 1 x 32 physical cores per processor (32 cores per node), 3.0 GHz, minimum 128 MB aggregate cache                  |
| b.                              | Compute Node 13 – OS Support                                                   | The system should support the following minimum operating systems without any deviations: Windows Server 2022 Windows Server 2025 RHEL 9.4 - 9.x Ubuntu 22.04 LTS VMware ESXi 8.0 U3, ESXi 9.0, ESXi 9.1 | The system should support the following minimum operating systems without any deviations: RHEL 9.4 - 9.x Ubuntu 22.04 LTS VMware ESXi 8.0 U3, ESXi 9.0, ESXi 9.1 |
| c.                              | Additional Infrastructure Point No 1 – UPS System                              | 42U Rack 42U, 19 inch server rack with sufficient PDUs to house all the rack-mountable hardware.                                                                                                         | REMOVED                                                                                                                                                          |
| d.                              | Additional Infrastructure Point No 4 – Cluster Interconnect and Network Switch | Minimum acceptable: a non-blocking managed minimum 24-port 1G switch with all cabling. A separate or VLAN-segmented management / IPMI network shall also be provided                                     | Minimum acceptable: a non-blocking managed minimum 16-port 1G switch with all cabling.                                                                           |
| e.                              | General Terms and Eligibility Point No 5 – Site Preparation                    | It is mandatory to submit the detailed power, cooling and rack-space requirements, including the schematic diagram and rack layout, along with the technical bid.                                        | It is mandatory to submit the detailed power, cooling, along with the technical bid                                                                              |
