Technical Specification of a Software Program

Software Program: FLOW-3D, together with the related programs known as FLOW-3D HYDRO, FLOW-3D CAST and FLOW-3D AM

A permanent license with one (1) solver 16-core instance token and a total of sixteen (16) core tokens for the CFD software program, with the High Pressure Die Casting Workspace. Maintenance Service is included for one year, issuance of the license.

An instance token represents the number of simultaneous instances of the FLOW-3D solver that can be run at any given time. The number of core tokens determines how many cores can be utilized in executing a given simulation.

Maintenance Service shall include:

1. 08 hours technical support
2. Access to the Flow-3D users site
